Call Us **1-877-692-9276**

## **How It Works**

---

When contacted by First Responders or ER hospital staff members and provided with your personal My Notification Service ID Number, our 24/7, professional call center staff will immediately start notifying the people on your contact list and electronically transmit any medical information in your file to the hospital that is caring for you.

ID kit provides stickers for your car, driver's license and passport, so that first responders, or hospital staff, are notified of your My Notification Service ID Number to contact your emergency contacts, or provide medical details.

My Notification Service is the only company of its kind that will not only relay potentially lifesaving medical information to hospitals but also alert EVERYONE on your contact list. Last year, over 20 million people were admitted to emergency rooms nationwide. In the unfortunate event you become one of them, your enrollment with My Notification Services will give you peace of mind knowing that the people who care about and rely on you the most will be aware of your situation.

## **Are you prepared for an Emergency?**

---

*My Notification Service* offers our subscribers an emergency medical and contact notification service. When an incident occurs, whether it is medically related, or an accident, our emergency call center team will send potentially lifesaving medical information, specified by you, to emergency responders or hospital staff anywhere in the world. We will notify up to 9 contacts, such as family, friends, someone to care for your child or pet, even your employer. You can choose to have them notified by phone, text message, or email, informing them of your situation and location. At MNS, our mission is to provide you with peace of mind.

## **Testimonial**

To the staff at My Notification Service, I can't thank you folks enough for helping our family during a medical emergency recently. My mom had been out with some friends when their car ran off the road and drove into a deep ravine. Mom had stuck her head and was unconscious at the scene, if not for your ID on her license we have no idea how long it would be before we were to have known what had happened to her. As it turns out because we were notified we were able to assist the police and hospital staff in contacting relatives of the other ladies in the vehicle, which was still quite a chore.

Thank you, and God bless.

Beatrice M.
